

FOOD WARMING WICK CHAFING FUEL

Patented wick design makes Diablo regularly burn hotter, longer and perform more efficiently than any other type of wick chafing fuel available on the market today!

APPLICATION:

DINE-AGLOW DIABLO™ Food Service Fuels manufactures Diablo® Food Warming Wick Chafing Fuel which is a nonpoisonous, clean burning Diethylene Glycol (DEG) chafing fuel that comes in a 6-Hour burn-time. This economical, convenient, food warming product is designed to keep chafing dish food pans consistently at their FDA regulated temperature. Diablo Wick Chafing Fuel led the industry from the traditional and dangerous gel fuel to the much safer, more efficient wick fuel. Diablo Wick products are odor-free, smokeless, non-toxic, non-hazardous and void of the inherent hazards of ethanol fuels.

PRODUCT FEATURES:

- Active Ingredient: Diethylene Glycol (DEG)
- Patented wick design makes it the fastest product to reach maximum heat output and maintain that heat output for duration of product
- Impeccable customer service for over 50 years
- Clean burning, non-toxic, non-hazardous, odor free
- Tested to guarantee quality and 100% Combustion
- Stay cool can is safe to handle even when in use
- No DOT restrictions
